

INTRODUCTION

This Peace Teaching Kit is provided by the Kamloops-Shuswap Peace Council to enable the teacher to provide programmes aimed at teaching peace as an alternative to war.

It is imperative that the students understand the nuclear age into which they were born, as it is our generation and theirs that will determine the future of the world. Will it be another Golden Age or a nuclear holocaust?

The teacher should be able to use this kit in all subject areas. Some important related events are U.N. Disarmament Week in October, Remembrance Day, Christmas and International Nuclear Awareness Day in late April. However, use of the kit certainly does not have to be limited to these dates, as peace is a daily concern.

CONTENTS

Pamphlets:

The Arms Menace.
Euro-missiles and the General Balance of NATO and Warsaw Pact Forces.
Facts and Figures About the Global Arms Build-up.
