

YELLOW SUBMARINE

(tune by Lennon & McCartney)

At the base near Bangor town
Not too far from where the bridge went down
They're building ships at our expense
First-strike weapons they call "defense"
In every town across the land
Unemployment is out of hand
But no solution can be seen
While they're still building submarines

We won't pay for the Trident submarine,
Trident submarine, Trident submarine
We won't pay for the Trident submarine,
Trident submarine, Trident submarine

Hungry people losing heart
While our cities fall apart
Fuel costs are on the run
While the war machine gets all the funds
3 billion dollars for one boat
while we're struggling to stay afloat
The time has come to end the waste
We must terminate the missile race

We won't stand for the Trident submarine, etc.

We will live to see the peace
Bring the admirals to their knees
Sky of blue and sea of green
We don't need your submarine!

We won't live with the Trident submarine, etc.
