

Further to Duff's Report - he states that even if Canada only became involved in 10% of the program - That 10% would require all the ^{of the} research depts of every major university in Canada.

It is ironic that we have just accorded Steve Fonyo a hero's welcome in Victoria for running across Canada ^{on his} to raise funds for badly needed cancer research to save millions of Canadian lives, and on the other hand, we would get involved in ~~financing~~ ^{to the tune of} a program, that ^{billions} can only result in the total destruction of humanity. It will be a great day when a 1 legged gen. has to run across Can. ^{for the Arms Race}. Those who believe ~~the~~ STAR Wars will usher in a new era of peace + security are dangerously misguided - The only security is the gradual elimination of all Nuc. weapons stockpiles, and a building of mutual trust and respect between the East and West - That's why the current Geneva talks must not fail.

Furthermore - the STAR WARS Program contravenes the 1972 Anti-Ballistic Missile Treaty.

Canadians must oppose STAR WARS with every means available to them; that is why SSPE is joining with peace groups across Canada to tell Mulroney we want no part of this insanity.

We have a program ^{3 part} out - Cards are available through members of peace groups. The card asks everyone to write to the PM. your Mp. -
- help sponsor an add to the paper.
