NEWS RELEASE

BETHLEHEM COPPER DONATES TRANSMISSION TO CARIBOO COLLEGE

Heavy Duty Mechanics instructor, Les Batchelor, College Acting Principal, Leo Perra, and Bill Price, Manager, Mine Production for Bethlehem Copper Corporation Ltd., look over the Allison Power Shift transmission his company recently donated to the Cariboo College Heavy Duty Mechanics training program.

The transmission is identical to the one used in the large hauler shown behind the group and will be a real aid to the College's training program since there is not sufficient time for mechanics students to tear down a vehicle of that size.

In addition to Heavy Duty Mechanics, Cariboo College offers a wide range of training programs in the mechanical field including a new program, Advanced Diesel and Gas Engines Technician, which is intended to supplement the College's current offerings.

For information on any of the mechanical trades training programs at Cariboo College contact the Registrar's Office at 374-0123.
